

Henrico County Public Schools Redistricting Project for 2017

**2017-18 DRAFT Redistricting Plan Community Survey
(small area of Hungary Creek Middle School proposed for
rezoning in Fall of 2017)**

Community Survey Response Analysis

Introduction

Henrico County Public Schools hosted an online survey from March 10, 2017 to March 19, 2017 in which the public was encouraged to complete questionnaires with their feedback regarding each small pocket/area option of Hungary Creek Middle School rezoning proposed for Fall 2017. The data resulting from the Community Survey should be used as a tool to help facilitate the redistricting process. It should not be used solely as a decision-making tool.

Analysis Methodology

Online survey responses were exported to an excel spreadsheet. The spreadsheet tracked the date the comment was received, contact information for the respondent, the current zoned middle school, and the respondent's comments on each small pocket/area option.

Responses from 150 respondents provided feedback on the small pocket/area options: 76% reside in the Hungary Creek Middle School zone, 17% reside in the Holman Middle School zone, and 7% reside in another middle school zone.

Total Respondents by Live-in Middle School Zone		
Live-in Middle School Zone	Total Respondents	Percent of Respondents
Brookland MS	3	2%
Holman MS	26	17%
Hungary Creek MS	114	76%
Moody MS	2	1%
Pocahontas MS	1	1%
Short Pump MS	3	2%
Wilder MS	1	1%
Total	150	

The survey asked respondents to share their general attitude towards a small pocket/area option based on the following categories: *Strongly support, Support, Neutral, Oppose, Strongly oppose, and Other*. In order to gain a better understanding of objections, respondents who did *not* support an option were also asked to provide a reason for their concern. The primary concern themes were: *Enrollment data, Feeder Patterns (i.e. elementary to middle, middle to high), Other, School transportation and / or walk zones, School zone boundaries (i.e., use of natural boundaries, such as roadways), Separation of community components (i.e., apartment units, residential subdivisions, etc.), and Phase-in plan for changes*.

Results Summary from Community Survey

Summary of Thoughts/Observations for Each Small Pocket/Area Option

When input was requested on thoughts/observations related to the small pocket/area of each option proposed for rezoning in Fall 2017, 207 typed comments were received.

Total Responses to "What are your thoughts/observations related to the small pocket/area of an Option proposed for rezoning in Fall 2017?"	
Option A Observations	106
Option C Observations	101
Total	207

The majority of responses submitted were in regard to the most suitable option for their particular neighborhood / subdivision.

Open-ended comments received are provided in Appendix A.

Summary of Overall Attitude for Each Small Pocket/Area Option

The table below shows respondents' answers to the question "What is your overall attitude toward the small pocket/area of an Option proposed for rezoning in Fall 2017?" 37% strongly support/support the small pocket/area of Option A and 48% strongly support/support the small pocket/area of Option C.

Options Attitude Summary				
Option Attitude	Option A Small Area		Option C Small Area	
Strongly support	42	28%	56	37%
Support	13	9%	16	11%
Neutral	11	7%	13	9%
Oppose	9	6%	13	9%
Strongly oppose	71	47%	32	21%
Other	2	1%	13	9%
No Response	2	1%	7	5%
Total	150		150	

Primary Concerns Summary Table

The table below shows the primary concerns of respondents when asked "If you indicated that you oppose or strongly oppose the small pocket/area of an Option proposed for rezoning in Fall 2017, what is your primary concern?" Frequently shared concerns with both small pocket/area options were feeder patterns, enrollment data, and separation of community components.

Options Primary Concern Summary				
Prominent Theme	Option A Small Area		Option C Small Area	
	Feeder patterns (i.e., elementary to middle, middle to high)	34	45%	17
Enrollment data	11	14%	9	19%
Separation of community components (i.e., apartment units, residential subdivisions, etc.)	12	16%	7	15%
Other	11	14%	6	13%
School transportation and/or walk zones	6	8%	4	8%
School zone boundaries (i.e., use of natural boundaries, such as roadways)	2	3%	4	8%
Phase-in plan for changes	0	0%	1	2%
Total	76		48	

Conclusion

To summarize, the data presented in this summary report will be utilized as a tool to help the district prioritize the options. However, when reviewing the options, the results of the community survey should *not* be the only deciding factor.

Appendix A

Live in Middle School	Option A Thoughts/Observations
Brookland MS	It doesn't make any sense!! Option C is a better fit for all involved.
Brookland MS	My daughters will be going to Brookland middle school and I feel like they should get the best education. I feel like Glen Allen schools are the best. Why can't they be zoned to go to Hungary Creek or Holman or Short Pump Middle? They deserve the best education there is to offer. I know Brookland isn't a bad school but I feel like they would get a better education at other schools. Don't they deserve a chance to be in the best schools? Brookland middle does not have the best rating right now.
Holman MS	Don't split THES!
Holman MS	I am in favor of Option A.
Holman MS	I like it, because people from Echo Lake would know more people going to Holman.
Holman MS	I oppose this solution because it fails to address the construction and development in the Pouncey Tract and Gayton Road corridors, which will likely overcrowd SPMS in the next 2-3 years, essentially re-creating the problems we are currently dealing with at HCMS.
Holman MS	I support option A
Holman MS	I think that it will overcrowd Holman school.
Holman MS	I would like the whole community to stay together in one school as they were in elementary.
Holman MS	Option A is sending kids from REALLY far away to Holman. Too far.
Holman MS	Strongly oppose
Holman MS	Think the lines make sense.
Holman MS	Would like Holman to remain splitting into only 2 high schools.
Holman MS	Both Options A and C are splitting our school community in half. This is unacceptable to us. Our THES community is committed to staying together with our friends and neighbors. Our families are angry and frustrated that this is the 4th redistricting (and splitting up) of our neighborhood in 8 years. We feel there are other feasible alternatives that have not been explored in the proposals or redistricted in the past. We would like THES to remain at Holman MS, in a single feeder pattern. As a resident of Willows Bend, Jameson Park, Scots Glen, Avery Green, Park Commons or Bellingham at Twin Hickory, this proposed redistricting has an even larger impact on our small neighborhood and children. The larger Twin Hickory subdivision is already split into two elementary schools (Twin Hickory ES and Colonial Trail ES) and now the proposals have us being split even more at the middle school level (75% to Short Pump MS and 25% to Holman MS). Middle school is difficult enough without being separated from their school and community friends. It is incredibly unfair that our children would be

separated from these friends and sent to an entirely different middle school when we have worked so hard to create a sense of community for them. We see a simple solution, shift east. We feel the County should look at shifting east rather than the only solution be shifting west. We need to be forward-thinking and not have a knee-jerk reaction. Shifting west will result in additional redistricting in a few years as a result of growth in the Western end of the county. There is population growth in the West End that is not represented in the numbers on the Census map. They are constantly fluid due to the large parcels of land that have already been approved for residential development, some of which have already started building, creating an immediate impact on school population. This is demonstrated in the growth in the Colonial Trail ES district, as these children are moving into trailers next year. CTES and other growth will directly impact the Short Pump MS membership numbers. This is a problem because it is the western edge of the County and there is nowhere else to shift these children who are being added in the new developments as Pocahontas MS is already close to capacity.;; We have reviewed the maps and census data and support Option C with modifications.;; Using your Targeted Membership Adjustment Table as our goal, we propose the following minor changes: 1) THES remains at Holman (342 students according to the 2016-17 Middle School Census Tract Map).;2) Hungary Creek students living East of Purcell Road and South of 295 move to Brookland (157 students). OR, alternatively, Hungary Creek students living East of Woodman Road move to Brookland (164 students). As a result of these minor changes;;- Either of these changes reduce the total number of HCPS impacted students from 558 as proposed in Option C to 420. Both of these changes improve transportation for impacted students. These options make efficient use of the present school facilities and consider the growth that will occur in the North Gayton corridor, effecting Short Pump MS. These proposals move towards better alignment of geographic zoning in these schools, providing geographically contiguous communities. It more evenly distributes the Estimated Poverty Rates among the schools. The Holman feeder pattern ratio is more evenly distributed between Deep Run and Glen Allen. These suggestions optimize the Targeted Membership Adjustment objective of 90% capacity. Our proposal puts Brookland at 30 (goal 185), Holman at 22 (goal 22), Hungary Creek at 45 (goal -205) and Short Pump at 183 (goal 305). Please note: These changes would work in Option A should the School Board feel it has more merit. With these minor changes, we believe we can accomplish HCPS' goal of a smooth redistricting with minimum impact on all middle schools involved. Thank you in advance for your consideration.

<p>Holman MS</p>	<p>My only comment is that I am BEYOND grateful that you will not be taking the current 5th graders at Shady Grove ES and suddenly switching them to Short Pump. The kids have all picked classes, visited the school, met faculty and staff, etc. Yanking them out after all of this has been accomplished would really throw them a curve when they are excited, but also already naturally apprehensive about the big step facing them. (Especially considering that many have already been forced out of beloved schools with the earlier elementary school redistricting.) Plus, my family, as well as others I know, made the decision to not even apply to Moody because we were so pleased with our Holman experiences. Important choices for the future were made based on the fact that our families would attend Holman. To change that plan now, with no way to rectify or modify those decisions, would be frustrating to say the least... And likely rage-inducing to say the most. Thank you for realizing that all of these 5th grade kids are currently on a set track and, while some need to be moved to enhance their current educational environment, the large majority should be left to forge forward without derailing them right before this important step in their education.</p>
<p>Hungary Creek MS</p>	<p>2017 pocket relief is inadequate. Incoming class of 6th graders is at least 50 kids larger than outgoing class of 8th graders. School is 111% capacity.</p>
<p>Hungary Creek MS</p>	<p>Agree</p>
<p>Hungary Creek MS</p>	<p>Agree</p>
<p>Hungary Creek MS</p>	<p>Agreed that Holman is a great choice!</p>
<p>Hungary Creek MS</p>	<p>As a resident in the Meadows at Carrington with a current 4th and 2nd grader at ELES these decisions will directly affect our children. My husband and I went to the open meeting last night at GAHS to learn and hear from others and yourself about the thoughts and the process behind these ideas. Some people we felt had valid arguments and concerns over the process and movements, however we were dismayed that it seemed to us that so many were out for their own agenda without taking into consideration the larger picture. Again, as a parent in the affected area, we are invested and hope to look at things a bit more objectively. Our largest take away from last night was, are we solving the problem? If overcrowding is the major issue, do we solve it with either options? We are fine with sending our children to either Hungary Creek or Holman, but we do NOT want them sitting in a class with 37 students when that is not the standard across the county. We have been so pleased with Henrico schools thus far and live here for that reason. Please do not disappoint us by not solving the real problem of overcrowding at Hungary Creek.</p>
<p>Hungary Creek MS</p>	<p>Before the 2016 school year we were told HCMS would not go over the 5% overcrowding they had experience in 2015 school year. Our kids entered HCMS with 100% overcrowding. I don't feel enough kids are being moved for the next school year.</p>

Hungary Creek MS	Concerning OPTION A, I'm very concerned that bussing redistricted Glen Allen Elementary students would entail driving on the highway (295) with no seatbelts.
Hungary Creek MS	Do not like it. Would like to keep kids in Broad Meadows neighborhood together, not separate! How can a community build together when we are all divided?
Hungary Creek MS	does not move enough kids out of HCMS
Hungary Creek MS	Doesn't maximize effort.
Hungary Creek MS	Echo Lake is a logical divide point between the Springfield Road Community and the Glen Allen Community. I do not support the small pocket/area in Option A.
Hungary Creek MS	Extend the zone for Holman to include the Mountain Road to Warren Road area.
Hungary Creek MS	Great
Hungary Creek MS	Great idea
Hungary Creek MS	Hate this - you're splitting Glen Allen Elementary
Hungary Creek MS	Having such a small amount wouldn't change anything for the 2017-18 school year. It should be at least 100 students, or enough to make a dent in the overcrowding.
Hungary Creek MS	I agree with it
Hungary Creek MS	I am against Option A
Hungary Creek MS	I am against splitting the Elementary School.
Hungary Creek MS	I am very strongly AGAINST option A. I DO NOT think it right for all the students down Mill road to be redistricted. I have no ill feeling against Holman. I think it is a good school, HOWEVER I am very much against my child having to ride a school bus on the interstate. There is no reason that should EVER have to happen unless they are going on a field trip. Not to mention those of us who will have children in 2 different schools at once. I realize I will have the option to move my 8th grader but WHY WOULD I DO THAT? That is not a good option. You should move students who are on Holman's side of the interstate to Holman!
Hungary Creek MS	I appreciate the lowering of the poverty rates at the county's Middle Schools with the highest poverty rates, even if that results in HCMS having a higher concentration of students at the poverty level attending HCMS due to the redistricting.

Hungary Creek MS	I believe that students should feed from their elementary to middle to high school with as little disruption as possible. So, children who would go to GAHS or Deep Run High would go to the elementary and middle schools that feed into that school. For example, Glen Allen Elem should continue to feed Hungary Creek because those students go on to GAHS not Deep Run. If you want to split students, then those students should feed into the High School served by that Middle School (so Glen Allen Elem to Holman to Deep Run or GAES to Hungary to GAES). Don't split students from the same Elementary School just for Middle School.
Hungary Creek MS	I do not want to see the GAES community split between middle schools. I think it's a better idea to move the balance of the Springfield Park students (to keep that school together) and the small group of Longan students who are closer to Holman.
Hungary Creek MS	I don't feel like more students should be pulled from Echo Lake Elementary to go to Holman. It makes more sense to take more students from Holman because they are closer to Holman. Kids make lasting friendships in elementary school, so not keep kids together from elementary school.
Hungary Creek MS	I don't feel like students who could (if needed) walk to a middle school should be zoned to one that is more than 2x the distance. The students that are coming from the far parts of Woodman should be re-zoned back to schools that are closest for them. This would leave ample space for the children who live in such close proximity. These children have attended elementary school and will go on to attend high school together. The children through school help parents build a strong community support system and to be split and have children from completely different areas filter in for middle schools years is not the solution.
Hungary Creek MS	I don't like it. I prefer option C which gives immediate relief for Hungary Creek. My child can't even finish her lunch which I pay for because of the overcrowding. I believe trailers are unsafe.
Hungary Creek MS	I don't think it would give enough immediate relief for Hungary Creek MS.
Hungary Creek MS	I don't want to see Glen Allen Elementary split!
Hungary Creek MS	I oppose option A because I know my neighbor for example will have one child in Hungary Creek and her younger son will have to go to Holman. There should at least be an opt-out for these situations. I also think there would be value in Glen Allen elementary kids all going to the same middle school.
Hungary Creek MS	I prefer Option A, as Holman appears to perform well academically. However, I don't want my child to be bused on the highway without proper restraints on the bus and on a busy stretch of highway, especially in the morning. Additionally, the small number of children that will be rezoned to Holman doesn't appear to address the large number of students/overcrowding that will remain at Hungary Creek Middle School.

Hungary Creek MS	I still do not understand why our neighborhood still zones into Tucker H.S. We should zone into Glen Allen like everyone around us does. Especially if Option C takes effect and our neighborhood rezones to Holman MS. Currently, none of Holman zones to Tucker, so the only friends from middle school our neighborhood will have that zone from Holman to Tucker with them, are the ones that live in our neighborhood.
Hungary Creek MS	I strongly oppose Option A as it will separate many of the Glen Allen neighborhoods that have strong ties with the Glen Allen Community. One of the major reasons to move into Glen Allen was the community ties. These neighborhoods have supported Glen Allen in youth athletics with coaches, kid participation, and much more and will be separated for a community that doesn't exist currently. Common sense would be to keep the Glen Allen community together and allow Option C to keep an un-established community at Virginia Center out of an already stressed school system.
Hungary Creek MS	I strongly oppose Option A, as it does not provide much relief for the overcrowding at HCMS.
Hungary Creek MS	I strongly oppose Option A. This does not seem to provide a long term solution to overcrowding in the future. The county should try to keep elementary school populations together as they advance into middle school. Also, running two buses through these affected neighborhoods - one to Hungary Creek and one to Holman because students that are already at Hungary Creek remain, while others that are entering go to a different school. You split up families that have multiple middle school aged children and you split up neighborhoods and the sense of community.
Hungary Creek MS	I support my current 5th grader beginning at Holman next school year. However, I'm confused about this gifted program at Wilder. My child and I do not support a different school for gifted classes. I don't want her to be part of the gifted program if that is the case.
Hungary Creek MS	I support option A
Hungary Creek MS	I support Option A
Hungary Creek MS	I support the move from Hungary Creek Middle School to Holman Middle School.
Hungary Creek MS	I think it is an excellent idea!
Hungary Creek MS	I think it's a great idea
Hungary Creek MS	I think it's logical to implement option A since just before Carrington community all the kids going to echo lake goes to Holman. So that section moving to Holman makes much more sense than Option C.
Hungary Creek MS	I think it's not enough, but I like it if it's paired with Option C.

Hungary Creek MS	I think that area is okay but I'd be interested in hearing how many students from GAES this would affect next year. It's a shame to have rising sixth graders tour HCMS as well as sign up for their classes for next year and then tell them they will not be attending that school next year. I don't understand the need to rush to move that small pocket of students...will it really help the overcrowding issue that much!?
Hungary Creek MS	I think this is a logical option to implement. Since this would not have larger disruption and there will be continuity from middle to Glen Allen High.
Hungary Creek MS	I think this is the wrong choice. Hungary Creek needs relief, this is true, but option A further drives the poverty levels apart in the counties middle schools. Jumping up just 2% for Holman and over 7% for HCMS is not in the best interest of the children. We should utilize option C for the best, 'most optimal results.
Hungary Creek MS	I think this option distributes the poverty better than Option C, it also appears to present solutions that as far as transportation are considered would be more efficient for the students and buses.
Hungary Creek MS	I think we need to move toward keeping all of Echo Lake together instead of moving more of ELES to Holman. Taking a left out of Carrington onto Staples Mill to get onto 295 is dangerous. Taking a bus on the S curve on Springfield Rd is dangerous. Carrington is on the same street as Hungary Creek (Springfield turns into Francistown) and is much closer to HCMS. You will be increasing poverty levels at HCMS and lowering them at Holman. Holman already has a very low poverty rate, shouldn't we try to make the schools more evenly diverse/balanced.
Hungary Creek MS	I would consider moving my child out of Hungary Middle School if this option is selected.
Hungary Creek MS	I would strongly support Option A for this redistricting plan.
Hungary Creek MS	If Carrington is going to switch to Holman, I'd rather it happen in 2017-18.
Hungary Creek MS	If I'm reading it correctly, it looks like we would be redistricted to Holman. If this is correct, I'm all for it.
Hungary Creek MS	I'm strongly in favor of Option A
Hungary Creek MS	It doesn't have an impact on my family but it seems a little odd. The peninsula of kids in this pocket go to HCMS while kids to the east have to drive through it to go to Holman. Is that the best option? Any way to switch the location of the pocket so the kids on the Eastern edge of the Holman district attend HCMS? You have better data and have studied this so your option is probably the best one but wanted to make a suggestion.

Hungary Creek MS	<p>It is not acceptable to adjust school districts with this short of notice. The students have attended orientation and registered at a particular school. The decision to redistrict should have been made well in advance, reflects poor decision making, and contradicts the Henrico Way. The capacity issue was known well in advance and the county had ample time to take action; however, the board of education remained impotent on this matter. Henrico County's lack of action and attention to this capacity issue should not negatively affect our children that have already made plans to attend and have started to acclimate to a new school. At this stage they have visited the school, met teachers and administrators, they have the security of knowing with which peers they will be continuing to continue, they have registered for their classes, and they have attended orientation. If a family has to make the tough choice to move a child in this stage of a child's life, that is their decision; this decision should not be imposed on them by the county. It appears the county is planning well in advance for future school years, Thank you! BUT DO NOT IMPOSE YOUR LACK OF PLANNING ON MY CHILD NEXT YEAR.</p>
Hungary Creek MS	<p>It seems a natural progression for our neighborhood to be included with others past the curve of Springfield Rd at Holman.</p>
Hungary Creek MS	<p>Keeping elementary school kids together is important as they move into a very awkward time in their lives. It makes sense to keep them together unless they choose to pursue IB/specialty education. This option does not make sense as it splits the school.</p>
Hungary Creek MS	<p>Kids will get school with higher rating. Kids will have opportunity to make new friends, which will help them later on when they go to college.</p>
Hungary Creek MS	<p>Makes no sense to take kids from 2 miles away from HCMS to Holman. There has to be a better solution</p>
Hungary Creek MS	<p>Move the line for Holman Middle School to Staples Mill Road and Warren Road.</p>
Hungary Creek MS	<p>Moving to better school helps kids to grow strong academic base.</p>
Hungary Creek MS	<p>My children are affected and I am ok with the rezoning.</p>
Hungary Creek MS	<p>My daughter would move to Holman. I want her to have the opportunity to attend the same schools as her brother who is currently at Hungary Creek.</p>

Hungary Creek MS	<p>My opinions on this are on the comprehensive plan survey but I will copy and paste. I do not like map A for the following reasons: 1. It would split up the Glen Allen elementary school community. This community has long been together and it would break up lasting friendships these children and parents have spent the time (and money) to cultivate. These children need the consistency of the same friends in elementary and middle school especially during such a difficult time in their lives both psychologically and developmentally. Consistency is paramount! We all know that seeing the same friends in school is pertinent to lasting friendships. Especially for busy parents who don't have the time to contact friends "you used to go to school with" for play dates. Also Mr. Cropper mentioned that the 60/40 split between Hungry Creek and Holman was "balanced". I have to respectfully disagree-as we know-that-is NOT balanced. My son just had a birthday party on Friday and out of the children that came, over half of them he would not see again in middle school. That makes me very sad. 2. I don't think Hungry Creek should have to reserve spaces for potential students in a housing development that hasn't even been built yet!!! I am referring to the River Mill development off Brook Road and any other new developments. Those new students need to go to Brookland!! 3. I can tell you now that I have spoken to enough Glen Allen Elementary parents, especially ones north of 295 in Hunton Park etc, (which is where most of my children's playmates live), and NO ONE wants our community split up. The only reason you will have any support for option A from those parents north of 295 (that could potentially go to Holman) is because of selfish reasons: 1. Those parents know their housing values will increase if Holman is there middle school. 2. They know that Holman will have to deal with way less poverty (11%) than Hungry Creek (32.9%) and let's face it, more poverty equals more behavioral issues and distractions in the classroom.</p>
Hungary Creek MS	<p>Not a fan of my child attending Holman. We moved to the Hunton Park area so that he could attend Hungary Creek Middle School from Glen Allen Elementary in hopes to further attending Glen Allen High School. The schools are SO CLOSE to us. Please revise so that Hunton Park - Vicars Ridge Lane are can attend Hungary Creek Middle School.</p>
Hungary Creek MS	<p>Not enough immediate relief for HCMS.</p>
Hungary Creek MS	<p>Not in favor of dividing up Glen Allen ES</p>
Hungary Creek MS	<p>Only provides minimal relief to Hungary Creek Middle school.</p>
Hungary Creek MS	<p>Option A allows for middle school poverty rates to be better aligned.</p>
Hungary Creek MS	<p>Option A allows for middle school poverty rates to be better aligned.</p>
Hungary Creek MS	<p>Option A is the best choice as it affects a smaller number of students and it is more efficient in terms of transportation.</p>
Hungary Creek MS	<p>Option A makes much more sense with minimal disruption</p>
Hungary Creek MS	<p>Option A only provides relief of 41 students for 2017/2018, while option C provides greater relief next year.</p>

Hungary Creek MS	Option A would put my child on a bus longer, away from his friends from elementary school.
Hungary Creek MS	Option C is the better option as Springfield Elementary is closer to Holman. It is an inconvenience for parents living in the Staples Mill area to transport children to Holman. Most of these parents also may have siblings already at Hungary Creek and it doesn't make logistical sense to move their siblings to a different school.
Hungary Creek MS	Sending more students to Short Pump and Holman are good ideas. Brookland meanwhile, remains completely without accreditation. Trailers should be lined up at any and all other schools until that school is turned around from lower 4% of middle school testing percentile statewide, no accreditation, not even partial. We are terrified our young kids may end up going to Brookland, having one child that has already graduated from 3 years at Brookland, and having moved already with intention of better schools for our kids 5 and 7 years old.
Hungary Creek MS	Several elementary schools are split between 2 middle schools
Hungary Creek MS	Thank you for leaving our Mountain Glen neighborhood and our elementary school (Greenwood) out of any of the options.
Hungary Creek MS	The part of option A that I think would work well is the Carrington neighborhood. It has been speculated for years that eventually Carrington will end up at Holman. If this will be part of the final redistricting for 2018-19, why not go ahead and take that pocket now? Added to those in Option C, HCMS will reduce by a handful of students from ELES, adding to the 68 from Springfield and Longan. I am a parent of current and previous ELES students. There is such a small percentage that now attends Holman that for those that go, it is bittersweet to lose so many friends in the transition to Middle School. This would certainly be helpful for those who might be rezoned in 2018-19.
Hungary Creek MS	The small area near 295 & Staples Mill Rd that is being considered to go to Holman MS is much closer to Hungary Creek. These children in this area have gone to Echo Lake elementary together and should stay together to go to Hungary Creek together. In option C, those kids that are being moved out of Hungary Creek did not go to Echo Lake elementary with the other kids in the area. Therefore, I feel option C is the best choice.
Hungary Creek MS	This option does little to even out the concentration of low-income students in certain schools.
Hungary Creek MS	This small pocket for Option A means that the county is committed to Option A for redistricting which I strongly oppose. The Option A uproots those already districted for Hungry Creek in order to make room for a potential new development at River Mill, in which no one lives yet.

Hungary Creek MS	This would negatively impact the socialization of the children in our neighborhood by removing them from their current social environment, introduce them to a new one and then again change that environment in high school. I would prefer they be able to maintain their existing friendships throughout their school experience in Glen Allen all the way through graduation.
Hungary Creek MS	We need to provide immediate relief to Hungary Creek Middle school. I'm in favor of the small pocket rezoning of Carrington.
Hungary Creek MS	We need to try to keep Echo Lake Elementary School together not separate it more! The routes from Carrington to Holman MS are dangerous. Making a left out of Carrington onto Staples Mill to get on 295 is dangerous. Taking S curve on Springfield is dangerous. Neighborhood is on same street as HCMS. Also option A raises the poverty level of HCMS. Shouldn't Holman and SPMS become more diverse? The whole purpose of redistricting at first was to relief Hungary Creek. Option A only reliefs about 41 where option C reliefs 68. That is a difference of 1-2 kids per class. Option C says it gives great relief so to me that is important. This hopefully would mean the trailers would be taken away sooner rather than later.
Hungary Creek MS	We want our child to feed from GAES to Hungary Creek. We don't want him to be split from half the kids at GAES (all of his friends) only to be sent to Holman (make new friends) and then go back to GAHS and lose all his new friends.
Hungary Creek MS	Wondering if this is a large enough population to make an impact.
Moody MS	I think it's reasonable, and a necessary response to the county schools' needs as a whole.
Pocahontas MS	Additional Hungary Creek students should be rezoned. Short Pump Middle School has plenty of space. Hungary Creek is bursting at the seams.
Short Pump MS	Ease of transportation to Holman compared to Option C but concern this pocket is moving west where there is constant new developments. Appear to be keeping more neighborhoods together than Option C
Short Pump MS	I think both plans are well thought out in most aspects and favor this one. However, I completely disagree with the poverty concentration approach. Artificially busing students from one area to another to change rates is a complete waste of time and money. Take those same resources and invest in more programs like JA and less busing. It didn't work 35 years ago when I was a student and still doesn't work. I agree with balancing the volumes and limiting busing, but not the poverty fallacy.

Short Pump MS	Nuckols Farm Elementary continues to be split with the majority of the school going to Pocahontas. I would like our feeder pattern to stay the same as the rest of the school. We want to keep out kids together. Please consider moving us to Pocahontas (since we are a small majority crossing Broad Street) or bringing more from Nuckols Farm with us to Short Pump Middle School.
---------------	---

Live in Middle School	Option C Thoughts/Observations
Brookland MS	I would like my kids to go to Hungry Creek or Holman instead of Brookland . Why can't their area be changed?
Brookland MS	Makes more sense fit all involved
Brookland MS	Strongly support
Holman MS	<p>Both Options A and C are splitting our school community in half. This is unacceptable to us. Our THES community is committed to staying together with our friends and neighbors. Our families are angry and frustrated that this is the 4th redistricting (and splitting up) of our neighborhood in 8 years. We feel there are other feasible alternatives that have not been explored in the proposals or redistricted in the past. We would like THES to remain at Holman MS, in a single feeder pattern. As a resident of Willows Bend, Jameson Park, Scotsglen, Avery Green, Park Commons or Bellingham at Twin Hickory, this proposed redistricting has an even larger impact on our small neighborhood and children. The larger Twin Hickory subdivision is already split into two elementary schools (Twin Hickory ES and Colonial Trail ES) and now the proposals have us being split even more at the middle school level (75% to Short Pump MS and 25% to Holman MS). Middle school is difficult enough without being separated from their school and community friends. It is incredibly unfair that our children would be separated from these friends and sent to an entirely different middle school when we have worked so hard to create a sense of community for them. We see a simple solution, shift east. We feel the County should look at shifting east rather than the only solution be shifting west. We need to be forward-thinking and not have a knee-jerk reaction. Shifting west will result in additional redistricting in a few years as a result of growth in the Western end of the county. There is population growth in the West End that is not represented in the numbers on the Census map. They are constantly fluid due to the large parcels of land that have already been approved for residential development, some of which have already started building, creating an immediate impact on school population. This is demonstrated in the growth in the Colonial Trail ES district, as these children are moving into trailers next year. CTES and other growth will directly impact the Short Pump MS membership numbers. This is a problem because it is the western edge of the County and there is nowhere else to shift these children who are being added in the new developments as Pocahontas MS is already close to capacity. We have reviewed the maps and census data and support Option C with modifications. Using your Targeted Membership Adjustment Table as our goal, we propose the following minor changes: 1) THES remains at Holman</p>

	<p>(342 students according to the 2016-17 Middle School Census Tract Map). 2) Hungary Creek students living East of Purcell Road and South of 295 move to Brookland (157 students). OR, alternatively, Hungary Creek students living East of Woodman Road move to Brookland (164 students). As a result of these minor changes: Either of these changes reduce the total number of HCPS impacted students from 558 as proposed in Option C to 420. Both of these changes improve transportation for impacted students. These options make efficient use of the present school facilities and consider the growth that will occur in the North Gayton corridor, effecting Short Pump MS. These proposals move towards better alignment of geographic zoning in these schools, providing geographically contiguous communities. It more evenly distributes the Estimated Poverty Rates among the schools. The Holman feeder pattern ratio is more evenly distributed between Deep Run and Glen Allen. These suggestions optimize the Targeted Membership Adjustment objective of 90% capacity. Our proposal puts Brookland at 30 (goal 185), Holman at 22 (goal 22), Hungary Creek at 45 (goal -205) and Short Pump at 183 (goal 305). Please note: These changes would work in Option A should the School Board feel it has more merit. With these minor changes, we believe we can accomplish HCPS' goal of a smooth redistricting with minimum impact on all middle schools involved. Thank you in advance for your consideration.</p>

<p>Holman MS</p>	<p>Like that all of Springfield Park would attend Holman. Think that balances out Holman and also is great for the elementary school. I'm torn on Holman being so divided among 3 high schools though.</p>

<p>Holman MS</p>	<p>My only comment is that I am BEYOND grateful that you will not be taking the current 5th graders at Shady Grove ES and suddenly switching them to Short Pump. The kids have all picked classes, visited the school, met faculty and staff, etc. Yanking them out after all of this has been accomplished would really throw them a curve when they are excited, but also already naturally apprehensive about the big step facing them. (Especially considering that many have already been forced out of beloved schools with the earlier elementary school redistricting.) Plus, my family, as well as others I know, made the decision to not even apply to Moody because we were so pleased with our Holman experiences. Important choices for the future were made based on the fact that our families would attend Holman. To change that plan now, with no way to rectify or modify those decisions, would be frustrating to say the least... And likely rage-inducing to say the most. Thank you for realizing that all of these 5th grade kids are currently on a set track and, while some need to be moved to enhance their current educational environment, the large majority should be left to forge forward without derailing them right before this important step in their education.</p>
<p>Holman MS</p>	<p>Still not perfect, but better than option C. The problem is that you are overloading Short Pump MS at a time when there is a lot of new construction in that area. If you look at the long term, isn't Short Pump MS going to get overcrowded? So, some of the neighborhoods being switched to Short Pump MS now will most likely be switched OUT of Short Pump in the future. Please instruct Holman and Short Pump principals to be lenient in allowing waivers. If my neighbor is going to get redistricted with either plan, we would prefer to just start there.</p>
<p>Holman MS</p>	<p>This seems more reasonable.</p>
<p>Holman MS</p>	<p>We have reviewed the maps and census data and support Option C with modifications. Using your Targeted Membership Adjustment Table as our goal, we propose the following minor changes. 1) THES remains at Holman (342 students according to the 2016-17 Middle School Census Tract Map). 2) Hungary Creek students living East of Purcell Road and South of 295 move to Brookland (157 students). As a result of these minor changes:| Either of these changes reduce the total number of HCPS impacted students from 558 as proposed in Option C to 420. Both of these changes improve transportation for impacted students. These options make efficient use of the present school facilities and consider the growth that will occur in the North Gayton corridor, effecting Short Pump MS. These proposals move towards better alignment of geographic zoning in these schools, providing geographically contiguous communities. It more evenly distributes the Estimated Poverty Rates among the schools. The Holman feeder pattern ratio is more evenly distributed between Deep Run and Glen Allen. These suggestions optimize the Targeted Membership Adjustment

	<p>objective of 90% capacity. Our proposal puts Brookland at 30 (goal 185), Holman at 22 (goal 22), Hungary Creek at 45 (goal -205) and Short Pump at 183 (goal 305). Please note: These changes would work in Option A should the School Board feel it has more merit. With these minor changes, we believe we can accomplish HCPS' goal of a smooth redistricting with minimum impact on all middle schools involved. Thank you in advance for your consideration.</p>
<p>Holman MS</p>	<p>We, as Twin Hickory Elementary School, represent the following neighborhoods: Addison at Wyndham Apartments, Autumnwood at Twin Hickory, Avery Green at Twin Hickory, Bellingham at Twin Hickory, Belmont Park at Twin Hickory, Bridlewood, Gardens at Twin Hickory, Harvest Glen at Twin Hickory, Hearthstone at Twin Hickory, Hickory Grove, Jamerson Park at Twin Hickory, Kensington, Mason Park, Millrace, Park Commons at Twin Hickory, Park Meadows at Twin Hickory, Regal Oaks at Twin Hickory, Saddleridge at Twin Hickory, Scotsglen at Twin Hickory, Shady Grove Meadows, Townes at Shady Grove, Turnberry, Willows Bend at Twin Hickory. Both Options A and C are splitting our school community in half. This is unacceptable to us. Our THES community is committed to staying together with our friends and neighbors. Our families are angry and frustrated that this is the 4th redistricting (and splitting up) of our neighborhood in 8 years. We feel there are other feasible alternatives that have not been explored in the proposals or redistricted in the past. We would like THES to remain at Holman MS, in a single feeder pattern. With these minor changes, we believe we can accomplish HCPS' goal of a smooth redistricting with minimum impact on all middle schools involved. Thank you in advance for your consideration.</p>
Hungary Creek MS	2017 pocket does not provide enough relief to Hungary Creek Middle School. Completely disapprove of solving accreditation issues with "busing" of kids.
Hungary Creek MS	Best proposed solution
Hungary Creek MS	Don't like c
Hungary Creek MS	Don't like it.
Hungary Creek MS	Don't like option C
Hungary Creek MS	helps relieve the overcrowding at HCMS now
Hungary Creek MS	I am agreeable to the small pocket as long as it aligns with all of Option C
Hungary Creek MS	I am not very supporting of Option c for our region.
Hungary Creek MS	I appreciate the lessened impact to current HCMS students and families due to this redistricting option.
Hungary Creek MS	I disagree.
Hungary Creek MS	I do not support this option.
Hungary Creek MS	I do not Support option C
Hungary Creek MS	I don't feel like Option C provides enough of an impact. Option C was at the bottom of my list.
Hungary Creek MS	I don't understand why three middle school are under capacity by a total of 70% and HCMS will still be over 90% capacity. The plan should be looked at more to even out each scoops capacity.
Hungary Creek MS	I like it! It keeps our kids together....at least until high school!
Hungary Creek MS	I like Option A better but am ok with either school for my daughter.
Hungary Creek MS	I like this option much better.

Hungary Creek MS	I like this plan better because it keeps the Glen Allen ES kids together at Hungary Creek. It doesn't split families who may end up with an 8th grader at Hungary Creek and a 6th grader at Holman. I know my elementary kids have been looking forward to going to Hungary Creek where their big brother is currently.
Hungary Creek MS	I prefer Option A because of the overcrowding. Concerned about transportation for children, I hope that will be covered
Hungary Creek MS	I prefer Option A for my student but Option C is acceptable
Hungary Creek MS	I still do not understand why our neighborhood still zones into Tucker H.S. We should zone into Glen Allen like everyone around us does. Especially if Option C takes effect and our neighborhood rezones to Holman MS. Currently, none of Holman zones to Tucker, so the only friends from MS our neighborhood will have that zone from Holman to Tucker with them, are the ones that live in our neighborhood.
Hungary Creek MS	I strongly disagree with Option C. Hungary Creek MS is a lot closer than Holman MS to the small pocket area.
Hungary Creek MS	I strongly support Option C as it will keep the Glen Allen community intact.
Hungary Creek MS	I strongly support Option C, as it provides more relief for the overcrowding at HCMS AND it integrates and entire residential area (that has been split between two middle schools).
Hungary Creek MS	I strongly support Option C. This option seems to keep feeder patterns for elementary schools/middle/high school and neighborhoods more intact.
Hungary Creek MS	I think it's not enough, but I like the rest of Option C, so I will support it.
Hungary Creek MS	I think Option A is better
Hungary Creek MS	I think Option C makes the most sense. The children who live so close to a school should attend that school! Not have children traveling from totally different parts of the county to attend only middle school when they have another school that is closer, and this would not split communities and children. Just by looking at it on the map, Option C makes so much more sense!!!
Hungary Creek MS	I think this is a better option. It keeps all of the GAES students together and allows for Springfield Park students to stay together as well.
Hungary Creek MS	I vote for option C because the least amount of students are affected. It keeps Glen Allen together. Also it keeps Hungry Creek's poverty ratios fairly stable. As a parent with my child zoned to go to Hungry Creek I am VERY concerned about a 7.4% poverty increase and the potential safety and behavioral distractions this may invoke on my child if Option A is implemented. Getting the poverty numbers out of Wilder was your main focus and I think it should stay your main focus, as your Tuckahoe representative reverberated at the last board meeting. This is achieved the best with Option C. Also I like Option C because Longan would get split between Hungry Creek and Holman. Although no one wants to see an elementary school split up, this would make the most sense because the majority of these houses are apartment buildings and town homes (more renters). There is less homeownership here and I feel that families are not as vested in this process. Also if they don't like the school the county assigned to them more people would have the ability to simply move to another school district. Also I like

	that Option C would NOT hold space at Hungry Creek for students in unbuilt developments!
Hungary Creek MS	I would love to keep my daughter in the same school as her friends from Elementary school. So I support Option C
Hungary Creek MS	It is absolutely a horrible idea to create a map where one middle school would be split between three high Schools. THREE? That speaks to a lack of concern for student welfare and incompetence in drawing district lines. If Plan C were to move forward the same kids effected should be immediately redistricted to Glen Allen High School to solve this. This should be included in Plan C or there should be no Plan C at all.
Hungary Creek MS	It is not acceptable to adjust school districts with this short of notice. The students have attended orientation and registered at a particular school. The decision to redistrict should have been made well in advance, reflects poor decision making, and contradicts the Henrico Way. The capacity issue was known well in advance and the county had ample time to take action; however, the board of education remained impotent on this matter. Henrico County's lack of action and attention to this capacity issue should not negatively affect our children that have already made plans to attend and have started to acclimate to a new school. At this stage they have visited the school, met teachers and administrators, they have the security of knowing with which peers they will be continuing, they have registered for their classes, and they have attended orientation. If a family has to make the tough choice to move a child in this stage of a child's life, that is their decision; this decision should not be imposed on them by the county. It appears the county is planning well in advance for future school years, Thank you! BUT DO NOT IMPOSE YOUR LACK OF PLANNING ON MY CHILD NEXT YEAR.
Hungary Creek MS	It makes A LOT more sense to me than Option A.
Hungary Creek MS	It provides the most relief for Hungary Creek Middle School enrollment.
Hungary Creek MS	Keeps kids together from elementary schools to middle to high school. Does not have children traveling a long distance to get to school.
Hungary Creek MS	makes more sense
Hungary Creek MS	More schools (specifically Glen Allen Elementary) are kept together and will attend the same middle schools. More relief for overcrowding at Hungary Creek Middle.
Hungary Creek MS	Move the line to Staples Mill Road and Warren Road for those students to attend Holman.
Hungary Creek MS	My children are not affected.
Hungary Creek MS	Oppose
Hungary Creek MS	Oppose
Hungary Creek MS	Option C aligns middle school poverty rates less effectively.
Hungary Creek MS	Option C is less effective at aligning middle school poverty rates.
Hungary Creek MS	Option C is the plan that I prefer for the Hunton Park area to attend Hungary Creek Middle School that feeds into Glen Allen Elementary. The main reason why we moved to the area. I would be willing to drive my child to school daily and pick him up in order to attend Hungary Creek Middle school.

Hungary Creek MS	Option C makes more sense for Townes (Villas) at Hunton Park because the students feed from GAES to Hungary to GAHS. If these students go to Holman, then they should also go to Deep Run.
Hungary Creek MS	Option C makes the poverty level more balanced and gives more relief to Hungary Creek. Option C keeps Echo Lake and Glen Allen Elementary School together more.
Hungary Creek MS	Option C provides more immediate relief for over-crowding at Hungary Creek. Looking longer term, Option C is the only option that addresses the large planned community River Mill. With the current overcrowding situation at Hungary Creek, they cannot absorb the new students from this large community.
Hungary Creek MS	Please keep GAES together for middle school. I just moved my child from another elementary school to Glen Allen knowing that she would be with friends down Mill Road. Please keep GAES together
Hungary Creek MS	Provides higher number of immediate relief to HCMS overcrowding, while impacting the least number of students in the long term plan.
Hungary Creek MS	Same as Option A, if I am correct to assume we would be redistricted to Holman.
Hungary Creek MS	See comments from Option A- include my overall thoughts.
Hungary Creek MS	Seems like a better option than A.
Hungary Creek MS	Seems like it maximizes all the resources for the county.
Hungary Creek MS	Sending more students to Short Pump and Holman are good ideas. Brookland meanwhile, remains completely without accreditation. Trailers should be lined up at any and all other schools until that school is turned around from lower 4% of middle school testing percentile statewide, no accreditation, not even partial. We are terrified our young kids may end up going to Brookland, having one child that has already graduated from 3 years at Brookland, and having moved already with intention of better schools for our kids 5 and 7 years old.
Hungary Creek MS	Short term pain for long-term gain! If we can keep the students in our neighborhood together, this will increase the quality of the community, which will increase accountability for students as they age up into high school. This also provides more relief for Hungary Creek Middle School.
Hungary Creek MS	Strongly oppose to Option C. OPTION A is better
Hungary Creek MS	Support the idea of keeping children from Springfield Park Elementary together into one Middle School.
Hungary Creek MS	Thank you for leaving our Mountain Glen neighborhood and our elementary school (Greenwood) out of any of the options.
Hungary Creek MS	The kids that are being moved from Hungary Creek did not go to Echo Lake elementary with other in the area that attended that school.
Hungary Creek MS	The small area proposal in Option C needs to be reconsidered as being included in the option because the small amount of students attending Springfield Park ES that will attend Hungry Creek MS instead of Holman MS and that would be affected by this portion contributes very little to the relief from overcrowding at Hungry Creek. There is also an issue of less efficient use of transportation (considering the proximity of the areas being considered) to Hungary Creek MS and Holman MS.

Hungary Creek MS	This is the best option of the two
Hungary Creek MS	This is the best option. Ensures children in the staples mill area follow their siblings to Hungary Creek and reduces burden on parents when their children are in the same school. Moving Springfield elementary to Holman makes the most sense as they are closer to the Holman district.
Hungary Creek MS	This is the option to choose to alleviate the kids at Hungary Creek. They have suffered the overcrowding long enough.
Hungary Creek MS	This keeps more Echo Lake students together and Hungary Creek gets greater capacity relief than Option A. As a parent and teacher, it's a win-win situation. Class sizes would be smaller, so instruction would be more manageable in the classroom. Students would have a better learning environment than a class that was at max count.
Hungary Creek MS	This makes more sense and impacts the fewest families and doesn't split yet another elementary school. These students are closer in proximity to Holman than the students you propose moving in Option A. This makes more logistical sense
Hungary Creek MS	This option appears to have issues rooted in transportation, since it is pulling students from the opposite side of the zones where there is available relief (farther west). It also does not redistribute poverty well.
Hungary Creek MS	This option does more than Option A, though still not enough, to alleviate the high concentration of students below the poverty level in some schools.
Hungary Creek MS	This option does not make sense
Hungary Creek MS	This option doesn't affect my neighborhood.
Hungary Creek MS	This option makes the most sense and least disruptive
Hungary Creek MS	This option makes the most sense as a current parent at HCMS. I will not be affected by this plan, because my child is in 8th grade and my other is in 4th. However, considering HCMS for my 4th grader depends on how these plans control the numbers in years to come. This plan takes away one of the hardest areas to successfully count, seeing as many are apartments. But Springfield Park ES has so few kids that come to HCMS. They aren't excited because so many of their friends are headed to Holman. It stinks, really. These kids have such a hard time adjusting. Taking these areas PLUS Option A's Carrington neighborhoods (north of Mountain, West of Staples Mill Rd) would create a good size reduction at HCMS. Plus, it would balance the ELES to Holman numbers, too! With HCMS's current numbers at 1100 and an influx of approx 60 for the incoming year, a reduction in just 68 students doesn't help the immediate need. This small pocket will bring our numbers to where we are now. That's not good enough. We will still have congestion in the hallways, strains on our infrastructure like lunches, gym classes and trailers. The reduction has to be 75+ to even make a real dent. We were quoted 1069 this year and have added 31 new students BEFORE March 1. If the projection for next year is 1148, based on the 1069 number, we are still sitting at a higher count for next year with the 68 students from Springfield and Longan transferred.
Hungary Creek MS	This option should NOT be implemented at all. This creates a problem from feeder system perspective + too long. This option is a NO NO

Hungary Creek MS	This option would work better as long as elementary kids are kept together. This option moves more, even if not enough, kids to another school.
Hungary Creek MS	This plan sends those closer to Holman there and keeps Glen Allen Elementary together.
Hungary Creek MS	This small pocket for Option C means that the county is committed to Option C for redistricting. I strongly support Option C for redistricting. Thus I would support this option for the small pocket proposal if moving some kids next year is needed.
Hungary Creek MS	This suits the academic and social goals of our child the best.
Hungary Creek MS	Too many cons, especially the additional concerns. Transportation isn't as efficient.
Hungary Creek MS	Very crowded roads going to school.
Hungary Creek MS	We prefer Option C. This allows more Echo Lake students to attend HCMS together.
Hungary Creek MS	While I don't oppose my child attending HCMS which is the case with Option C, it doesn't address the large number of students which will remain at Hungary Creek. Overcrowding will continue to be an issue as new housing developments and families move into this school zone. This option doesn't seem to address the issue of overcrowding as much as Option A. Overcrowding is unfair to the families and children who pay taxes in this school district. Large class room sizes are directly related to poor academic performance and behavior issues that can be managed in a smaller setting.
Hungary Creek MS	Would like to see the Holman Middle zone to include the Mountain Road to Warren Road area as it seems that HCMS would still be overcrowded due to the size of the zoning and the neighborhoods that fall in that area.
Moody MS	I don't think this option is entirely fair; I think it is too aimed at keeping the "rich side of town" happy.
Pocahontas MS	Over 1/4 of SPMS space is not being utilized. A larger pocket/area of Hungary Creek students should be considered for rezoning and attending SPMS for the 2017-18 school year.
Short Pump MS	Geographically they are closer to Hungary Creek and transportation to Holman is less efficient. Splitting up neighborhoods more than Option A.
Short Pump MS	This is also a well-designed plan, but option A seems a bit less complex. Based on my experience living as a parent in several states (NC, AR, VA) I believe the poverty concentration argument holds no value. The priorities should be school capacity and cost of transportation, including how long kids stay on bus. Putting the academy in Wilder to chance the poverty concentration is a proven waste of resources. It was not a positive impact 35 years ago when I was a kid and it still doesn't work today. Focus on the impact to the kids, not some poverty concentration window dressing.
